## Description

We are looking for a skilled IT Business Analyst to join our team in the UK industry. As an Analyst, you will be a vital bridge between company leadership, operational teams, and software developers to turn business problems into working technology solutions. This position offers the opportunity to work on a variety of projects, collaborate with other team members, and contribute to the success of our projects.

## Responsibilities

- Talk with associates to figure out what a system or software needs to do.
- Look at current business workflows and find ways to make them faster or cheaper.
- Create visual charts, data flows, and wireframes to guide IT teams.
- Translate complex tech talk into plain business language (and vice versa).
- Help define user tests and ensure the final software meets the original goals.
- Finding the root cause of a business issue using evidence and data.
- Running workshops, presenting findings, and writing clear user stories.
- A solid grasp of digital systems, data structures, and software development.
- Managing expectations across different levels of an organization.

## Requirements

- Proven experience as an IT Analyst or similar role.
- Strong knowledge of client-side projects
- Good understanding of the role principles.

The training will be given continuously. Our Employers hold an A-rated Sponsor License from the UK Home Office, hence the UK Skilled Worker Visa Sponsorship is provided with CoS for 3 Years. The company will take care of the maintenance of the employee and the employee's family.

**Start Date :** Immediate

**Salary:** £55000 per annum plus incentives

**Location:** Remote
