Description

We are looking for a skilled Web Developer to join our team in the UK industry. As a Web Developer, you will be responsible for designing and modifying websites, from layout to function. You will strive to create visually appealing sites that feature user-friendly design and clear navigation. This position offers the opportunity to work on a variety of projects, collaborate with other team members, and contribute to the success of our digital presence.

Responsibilities

- Designing website layout and ensuring user experience is intuitive and visually appealing.
- Writing well-designed, testable, efficient code by using best software development practices.
- Integrating data from various back-end services and databases.
- Creating and maintaining software documentation.
- Staying up-to-date with emerging technologies and industry trends.
- Troubleshooting and debugging website issues.
- Collaborating with web designers to match visual design intent.
- This list is not an exhaustive list, but will have more additional allied responsibilities.

Requirements

- Proven experience as a Web Developer or similar role.
- Strong knowledge of client-side scripting and frameworks such as Wordpress
- Good understanding of SEO principles.

The training will be given continuously. Our Employers hold an A-rated Sponsor License from the UK Home Office, hence the UK Skilled Worker Visa Sponsorship is provided with CoS for 3 Years. The company will take care of the maintenance of the employee and the employee's family.
